Professional Summary

An experienced Full-Stack Web Developer who embarked on this journey 9 years ago. Proficient in various frameworks and languages including Laravel, NodeJS, React, and NextJS with passion for new technologies. I have successfully completed numerous projects that demonstrate my expertise.

Education

Zagizag University **Sep. 2020 – 2025**
B.Sc. in Electronics and Communication Engineering (ECE), Graduated *Zagizag, Egypt*

- Military Status: **Postponed**

Experience

CoreVine **Nov 2024 – Present**
Full Stack Web Developer *Remote*

- Designed, developed, and maintained full-stack web applications using modern frameworks and technologies such as React.js, Nextjs, Node.js, and Laravel and Python.
- Collaborated with cross-functional teams including designers, product managers, and other developers to deliver high-quality software solutions.

DEPI **July 2024 – Nov 2024**
Front End Developer Internship *Zagizag*

- Assisted in the development of responsive and user-friendly web interfaces using HTML5, CSS3, JavaScript, and modern frameworks like React.
- Worked with RESTful APIs to fetch and display dynamic data on the front end, enhancing user interactivity.
- Stayed updated with emerging front-end technologies and best practices, applying them to ongoing projects.

Projects

TRide | *NextJS Node.js, MySQL, MongoDB, Redis, Google Maps API*

- Smart and secure school transportation app designed for parents to track their children's rides.
- Book private cars or shared rides using a user-friendly mobile app with separate parent and driver versions.
- Features include live tracking, online payments, and an admin dashboard to control the entire platform.

Faculty Education System | *ReactJS, Laravel, MySQL*

- This website I've created to ensure the good communication between students and professors and also studying content
- Implemented a strong UI and features to help students with their courses
- Professors can send assignments, tasks, and quizzes
- Students can see their grades through their education in the faculty and see all the content.

INote Dashboard | *ReactJS, Laravel, MySQL*

- Dashboard Website for contracting company responsible for building.
- The company can create sheets for the data like materials, consumed money, and others
- You can select a date and customize your sheet data, and include some statistics.

Project Management System | *NextJS, TailwindCSS, MySQL, ReactQuery*

- A website for handling tasks between team members.
- This website has subscriptions to different plans, you can choose the plan that's suitable for your team.
- You can create multiple projects, assign tasks, roles to your team members.
- Every team has its own roles you can customize who can add, create, assign, remove members and other things from the team dashboard.
